Executive summary:

PVAA: Digital acumen

Discovery adopted, effectively integrated, and managed artificial intelligence across all its operational functions. Discovery identified the threats (risks) associated with the adoption and proactively safeguarded against them by establishing an Artificial Intelligence forum responsible for the regulatory compliance, data security and cybersecurity, ethical, and responsible management of artificial intelligence.

Furthermore, discovery provides training for its employees to ensure effective work transitions and to raise awareness of potential AI threats and AI shortfalls.

Data analytics tool, excel, is used to analyse the financial performance of Discovery for time period of 5 years. Data description, trend, variances, and pattern are analysed and the current financial income position is evaluated to provide future financial perfomance predictions.
